Targo®
Emergency Services

# Life-Saving Avionics

For the first time, **Targo®** puts **HMA** technology in the hands of emergency services personnel. You operate in all conditions, you need a tool that can adapt. Facing close ground proximity and adverse weather, **Targo® Emergency Services** gives you increased situational awareness, safety levels and operational abilities.

Ready to fly, fully stand-alone, zero-integration configuration, tailored to your needs.

- Share information with aircrafts and services in the area and increase situational awareness with **Targo®SkyNet**, your portable local-area data-link extension.
- Improve mission management in all conditions with pop-up mission advisory information and an on-demand database viewer.
- Examine every angle with **Targo®'s** advanced recording and debriefing system.
  Full audio and video recall gives you the ability to debrief platform conditions and information for each crewmember.
